Dear FCC:

Previous mistakes in allowing consolidation of ownership of television and radio stations have limited my ability to receive different points of view and reduced the variety of information I now receive from these media outlets. I insist that you not make another mistake by prohibiting XM Radio from providing instant traffic & weather information services. They are providing a valuable service to me that is not available from any local or nationally affiliated radio station. You must reject the NAB's petition 04-16, otherwise you will be making another mistake that is not in the public interest.
